

EXPERIENCE

Freelancing

Lead development and design of website's UI/UX. I worked alone and in teams filling various positions.

PROJECTS

Unanimity

As the project coordinator of a messenger web app, I managed the structure of the react.js components. I ensured that all components would work together and providing simple effective solutions to arising problems.

PTC BMX

As the lead developer of a volunteer organization website, I provided a sleek easy to use website. Which allowed its user to efficiently find the information they need.

C & R compressors

Working in a team as the lead designer, I created a simplistic effective design that created an effective web presence for C&R.
