Recent Work

Unanimity

As a team leader I planned, implemented, and refractored Unanimity. I was able to reduce the amount of code by 11% and simplified the code base.

Stack: React.js, Redux, React Router, SCSS

Github: https://github.com/Blaine137/unanimityFIREBASE

PTC BMX

As the lead developer of a volunteer organization website, I provided a sleek easy to use website. Which saved the user as much as 3 seconds of searching.

Stack: PHP, HTML, Materialize CSS

Github: https://github.com/transformerjnm/PTC-BMX

Georgia Gifts

As the lead developer I designed and developed the app. By using reactstrap I was able to develop the app efficiently without sacrificing quality.

Stack: React.js, React Router, ReactStrap

Github: https://github.com/transformerjnm/georgia-gifts-react

Proficient Skills

React.js

Redux

React Router

JavaScript (ES6, ES7, ES8)

Materialize CSS

Bootstrap CSS

HTML5

CSS, SCSS

Past Experience

PHP7

MYSQL

My Education

Computer Programming Associate

Southern Crescent Technical College

December 2019

3.9 Grade Point Average

Nucamp Bootcamp

Full stack web-development
