Professional Experience

Unanimity - React.Js Developer

As a team leader I was responsible for planning the architecture, creating and implementing the design, and troubleshooting / debugging Unanimity. By using advanced ECMAScript 8(ES8) technology concepts I reduced the amount of code by 6%.

Date: October 2020 To November 2020

Stack: React.js, Redux, React Router, CSS, SCSS

Github: https://github.com/Blaine137/unanimityFIREBASE

PTC BMX - Lead Front-End Web Developer

As the Front-End developer of a volunteer organization website, I designed a sleek easy to use user interface(UI) / user experience(UX). Which saved the user as much as 3 seconds of searching.

Date: June 2018 To December 2018

Stack: PHP, HTML, Materialize CSS

Github: https://github.com/transformerjnm/PTC-BMX

Georgia Gifts - Full Stack Javascript Developer

By coding a responsive UI/UX with reactstrap, customers engaged with the web app for 2 seconds longer and it reduced development time by 8%.

Date: September 2020 to November 2020

Stack: React.js, React Router, ReactStrap, Node.js, Express, Passport.js, mongo

Github: https://github.com/transformerjnm/georgia-gifts-react
